Independent Auditors' Review Report

To the Board of Directors of Associated Industries China, Inc.:

Introduction

We have reviewed the accompanying consolidated balance sheets of Associated Industries China, Inc. and its subsidiaries ("the Group") as of June 30, 2019 and 2018, and the related consolidated statements of comprehensive income for the three months and six months ended June 30, 2019 and 2018, as well as the changes in equity and cash flows for the six months ended June 30, 2019 and 2018, and notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34, "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

Except as explained in the Basis for Qualified Conclusion paragraph, we conducted our reviews in accordance with Statement of Auditing Standard 65, "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of the consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the generally accepted auditing standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Basis for Qualified Conclusion

As stated in Note 4(b), the consolidated financial statements included the financial statements of certain non-significant subsidiaries, which were not reviewed by independent auditors. These financial statements reflect the total assets amounting to \$39,969 thousand and \$33,359 thousand, constituting 4.41% and 3.58% of consolidated total assets; the total liabilities amounting to \$7,932 thousand and \$3,154 thousand, constituting 2.23% and 1.00% of consolidated total liabilities as of June 30, 2019 and 2018, respectively; as well as the total comprehensive income (loss) amounting to \$(4,409) thousand, \$(1,493) thousand, \$(7,952) thousand and \$(3,059) thousand, constituting 62.31%, 273%, 29.89% and 66.03% of the absolute value of consolidated total comprehensive income (loss) for the three months and the six months ended June 30, 2019 and 2018, respectively.

Furthermore, as stated in Note 6(f), the other equity accounted investments of the Group in its investee companies of \$108,047 thousand and \$123,641 thousand as of June 30, 2019 and 2018, respectively, and its equity in net earnings on the investee companies amounting to \$(3,386) thousand, \$(1,336) thousand \$(7,052) thousand and \$(1,336) thousand for the three months and six months ended June 30, 2019 and 2018, respectively, were recognized solely on the financial statements prepared by the investee companies, but not reviewed by independent auditors.

Qualified Conclusion

Except for the adjustments, if any, as might have been determined to be necessary had the financial statements of certain consolidated subsidiaries and equity accounted investee companies described in the Basis for Qualified Conclusion paragraph above been reviewed by independent auditors, based on our reviews, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as of June 30, 2019 and 2018, and of its consolidated financial performance and its consolidated cash flows for the three months and six months ended June 30, 2019 and 2018, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IASs 34, "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the reviews resulting in this independent auditors' review report are Yiu-Kwan Au and Kuan-Ying Kuo.

Annual Improvements to IFRS Standards 2015–2017 Cycle	January 1, 2019

Except for the following items, the Group believes that the adoption of the above IFRSs would not have any material impact on its consolidated financial statements. The extent and impact of signification changes are as follows:

(i) IFRS 16"Leases"

IFRS 16 replaces the existing leases guidance, including IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases – Incentives and SIC-27 Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

Notes to the Consolidated Financial Statements

The Group applied IFRS 16 using the modified retrospective approach, under which the cumulative effect of initial application is recognized in retained earnings on January 1, 2019. The details of the changes in accounting policies are disclosed below,

1) Definition of a lease

Previously, the Group determined at contract inception whether an arrangement is or contains a lease under IFRIC 4. Under IFRS 16, the Group assesses whether a contract is or contains a lease based on the definition of a lease, as explained in Note 4(c).

On transition to IFRS 16, the Group elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Group applied IFRS 16 only to contracts that were previously identified as leases. Contracts that were not identified as leases under IAS 17 and IFRIC 4 were not reassessed for whether there is a lease. Therefore, the definition of a lease under IFRS 16 was applied only to contracts entered into or changed on or after January 1, 2019.

2) As a lessee

As a lessee, the Group previously classified leases as operating or finance leases based on its assessment of whether the lease transferred significantly all of the risks and rewards incidental to ownership of the underlying asset to the Group. Under IFRS 16, the Group recognizes right-of-use assets and lease liabilities for most leases — i.e. these leases are on-balance sheet.

The Group decided to apply recognition exemptions to short-term and/or low-value item leases of office equipment.

Leases classified as operating leases under IAS 17

At transition, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Group's incremental borrowing rate as of January 1, 2019. Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments — the Group applied this approach to all other lease.

In addition, the Group used the following practical expedients when applying IFRS 16 to leases.

- Applied a single discount rate to a portfolio of leases with similar characteristics.
- Adjusted the right-of-use assets by the amount of IAS 37 onerous contract provision immediately before the date of initial application, as an alternative to an impairment review.
- Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term.

Notes to the Consolidated Financial Statements

- Excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

3) As a lessor

The Group is not required to make any adjustments on transition to IFRS 16 for leases in which it acts as a lessor, except for a sub-lease. The Group accounted for its leases in accordance with IFRS 16 from the date of initial application.

4) Impacts on financial statements

On transition to IFRS 16, the Group recognized additional \$33,689 thousands of right-ofuse assets and lease liabilities. When measuring lease liabilities, the Group discounted lease payments using its incremental borrowing rate at January 1, 2019. The weightedaverage rate applied is 1.72%.

The explanation of differences between operating lease commitments disclosed at the end of the annual reporting period immediately preceding the date of initial application, and lease liabilities recognized in the statement of financial position at the date of initial application disclosed as follows:

	Janua	ary 1, 2019
Operating lease commitment at December 31, 2018 as disclosed in the Group's consolidated financial statements	\$	35,143
Recognition exemption for:		
short-term leases		(233)
	\$	34,910
Discounted using the incremental borrowing rate at January 1, 2019		
(Lease liabilities recognized at January 1, 2019)	\$	33,689

(ii) IFRIC 23 "Uncertainty over Income Tax Treatments"

In assessing whether and how an uncertain tax treatment affects the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits, as well as tax rates, an entity shall assume that a taxation authority will examine the amounts it has the right to examine and have a full knowledge on all related information when making those examinations.

Notes to the Consolidated Financial Statements

If an entity concludes that it is probable that the taxation authority will accept an uncertain tax treatment, the entity shall determine the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits, as well as tax rates consistently with the tax treatment used or planned to be used in its income tax filings. Otherwise, an entity shall reflect the effect of uncertainty for each uncertain tax treatment by using either the most likely amount or the expected value, depending on which method the entity expects to better predict the resolution of the uncertainty.

On transition to IFRSIC 23, there is no significant impact on the tax liabilities and retain earning.

(b) The impact of IFRS endorsed by FSC but not yet effective

The following new standards, interpretations and amendments have been endorsed by the FSC and are effective for annual periods beginning on or after January 1, 2020 in accordance with Ruling No. 1080323028 issued by the FSC on July 29, 2019:

	Effective date
New, Revised or Amended Standards and Interpretations	per IASB
Amendments to IFRS 3 "Definition of a Business"	January 1, 2020
Amendments to IAS 1 and IAS 8 "Definition of Material"	January 1, 2020

Except for the following items, the Group believes that the adoption of the above IFRSs would not have any material impact on its consolidated financial statements. The extent and impact of significant changes are as follows:

Amendments to IAS 1 "Presentation of financial statement" and IAS 8 "Definition of Material".

The amendments clarify the definition of material and how it should be applied by including in the definition guidance that until now has featured elsewhere in IFRS Standards. In addition, the explanations accompanying the definition have been improved. Finally, the amendments ensure that the definition of material is consistent across all IFRS Standards. The Group will continue to assess the impacts of this amendment on its consolidated financial position and financial performance.

(c) The impact of IFRS issued by IASB but not yet endorsed by the FSC

As of the date, the following IFRSs that have been issued by the International Accounting Standards Board (IASB), but have yet to be endorsed by the FSC:

New, Revised or Amended Standards and Interpretations	Effective date per IASB
Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets Between an Investor and Its Associate or Joint Venture"	Effective date to be determined by IASB
IFRS 17 "Insurance Contracts"	January 1, 2021

Effective date

The Group is evaluating the impact of its initial adoption of the abovementioned standards or interpretations on its consolidated financial position and consolidated financial performance. The results thereof will be disclosed when the Group completes its evaluation.

(4) Summary of significant accounting policies

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with the preparation and guidelines of IAS 34 "Interim Financial Reporting" which are endorsed and issued into effect by FSC, and do not include all of the information required by the Regulations and International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations and SIC Interpretations endorsed and issued into effect by the FSC (hereinafter referred to IFRS endorsed by the FSC) for a complete set of the annual consolidated financial statements.

Except the following accounting policies mentioned below, the significant accounting policies adopted in the consolidated financial statements are the same as those in the consolidated financial statement for the year ended December 31, 2018. For the related information, please refer to note 4 of the consolidated financial statements for the year ended December 31, 2018.

(c) Lease (applicable from January 1, 2019)

(i) Identifying a lease

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assesses whether:

- 1) the contract involves the use of an identified asset this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, then the asset is not identified; and
- 2) the Group has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- 3) the Group has the right to direct the use of the asset when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of an asset if either:
 - the Group has the right to operate the asset; or
 - the Group designed the asset in a way that predetermines how and for what purpose it will be used.

At inception or on reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices. However, for the leases of land and buildings in which it is a lessee, the Group has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

(ii) As a leasee

The Group recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be reliably determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

-	fixed payments;
=	variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
_	amounts expected to be payable under a residual value guarantee; and
=	payments for purchase or termination options that are reasonably certain to be exercised.
	lease liability is measured at amortized cost using the effective interest method. It is easured when:
	there is a change in future lease payments arising from the change in an index or rate; or
=	there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee; or
=	there is a change in the Group's estimate of purchase options; or
-	there is a change of its assessment on whether it will exercise an extension or termination

When the lease liability is remeasured, other than lease modifications, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or in profit and loss if the carrying amount of the right-of-use asset has been reduced to zero.

option; or

there is any lease modifications

When the lease liability is remeasured to reflect the partial or full termination of the lease for lease modifications that decrease the scope of the lease, the Group accounts for the remeasurement of the lease liability by decreasing the carrying amount of the right-of-use asset to reflect the partial or full termination of the lease, and recognize in profit or loss any gain or loss relating to the partial or full termination of the lease.

The Group presents right-of-use assets that do not meet the definition of investment and lease liabilities as a separate line item respectively in the statement of financial position.

The Group has elected not to recognize right-of-use assets and lease liabilities for short-term leases of asset that have a lease term of 12 months or less and leases of low-value assets. The Group recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

(iii) As a leasor

When the Group acts as a lessor, it determines at lease commencement whether each lease is a finance lease or an operating lease. To classify each lease, the Group makes an overall assessment of whether the lease transfers to the lessee substantially all of the risks and rewards of ownership incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then the lease is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset.

(d) Income taxes

The income tax expenses have been prepared and disclosed in accordance with paragraph B12 of International Financial Reporting Standards 34, Interim Reporting.

Income tax expenses for the period are best estimated by multiplying pre-tax income for the interim reporting period by the effective annual tax rate as forecasted by the management. This should be recognized fully as tax expense for the current period.

For a change in tax rate that is substantively enacted in an interim period, the effect of the change immediately should be recognized in the interim period in which the change occurs.

Temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and their respective tax bases shall be measured based on the tax rates that have been enacted or substantively enacted at the time of the asset or liability is recovered or settled, and be recognized directly in equity or other comprehensive income as tax expense.

(5) Significant accounting assumptions and judgment, and major sources of estimation uncertainty

The preparation of the consolidated financial statements in conformity with the Regulations and IFRSs (in accordance with IAS 34 "Interim Financial Reporting" and endorsed by the FSC) requires management to make judgments, estimates and assumptions that affect the application of the accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from these estimates.

In the preparation of the consolidated financial statements, the significant accounting assumptions, judgment and major sources of estimation uncertainty are consistent with Note 5 of the annual consolidated financial statements for the year ended December 31, 2018.

(6) Explanation of significant accounts

Except for the following disclosures, there is no significant difference as compared with those disclosed in the consolidated financial statements for the year ended December 31, 2018. Please refer to Note 6 of the 2018 annual consolidated financial statements.

(a) Cash and cash equivalents

The Group holds derivative financial instruments to hedge certain foreign exchange risk the Group is exposed to, arising from its operating activities. The following derivative instruments, without the application of hedge accounting, were classified as mandatorily measured at fair value through profit or loss as follows:

		June 30, 2019	
	Contract amount (in thousands)	Currency	Maturity date
Financial liabilities:			
Forward exchange sold	EUR1,006	EUR to USD	2019.07.15~2019.08.16

(c) Financial assets at fair value through other comprehensive income-non-current

	June 30, 2019	December 31, 2018	June 30, 2018
Equity investments at fair value through other comprehensive income:			
Preferred stock unlisted on foreign market- IRONYUN	\$ <u> </u>		33,974

- (i) The Group designated the investments shown above as equity securities at fair value through other comprehensive income, because these equity securities represent those investments that the Group intends to hold for long-term for strategic purposes.
- (ii) The Group purchased newly issued shares of IRONYUN INCORPORATED (IRONYUN) in November 2017, amounting to \$3,010. The investments were accounted for as non-current prepayments for investments since the Group has not yet to acquire the shares. On December 31, 2018, the Group's cumulative investment amount was \$36,984 (including prepayment for investments), then the Group measured its fair value to \$0, and recognized total amount of unrealized evaluation loss. Please refer to Note 6(b) of the 2018 annual consolidated financial statements for other related information.
- (iii) Taiwan Biophotonic Corporation (tBPC) increased its capital through cash injection, wherein the Group participated and increased its investment amounting to \$31,527 in 2018. The percentage of equity ownership on the investment of the Group had increased to 26.3%; therefore, the Group had significant influence over it, the Group remeasured the fair value of its investment amounting to \$93,450, and accounted it for using the equity method, the gain of \$43,450, transferred to retained earnings from other comprehensive income. Please refer to Note 6(f) for other related information.
- (iv) As of June 30, 2019, the Group did not provide any of the aforementioned financial assets as collaterals for its loans.
- (v) For credit risk and market risk; please refer to note 6(v).
- (d) Notes and accounts receivable

	\$_	72,222	98,560	79,029

The Group applies the simplified approach to provide for its expected credit losses, i.e. the use of lifetime expected loss provision for all receivables. To measure the expected credit losses, accounts receivable have been grouped based on shared credit risk characteristics and the days past due, as well as incorporated forward looking information. The loss allowance provision was determined as follows:

			June 30, 2019

	\$	98,125	123,900	<u>192,473</u>	249,051

For the three months ended June 30, 2018, the write-down of inventories to net realizable value amounted to \$523. For the three months ended June 30, 2019, and six months ended June 30, 2019 and 2018, the Group reversed allowance for inventory valuation loss and obsolescence amounting to \$910, \$616 and \$319.

As of June 30, 2019, December 31 and June 30, 2018, the Group did not provide any inventories as collaterals for its loans.

(f) Investments accounted for using equity method

The components of investments accounted for using the equity method at the reporting date were as follows:

(ii) Retained Earnings

The Company's article of incorporation stipulate that Company's net earnings should first be used to offset the prior years' deficits, if any, before paying any income taxes. Of the remaining balance, 10% is to be appropriated as legal reserve, and the others are supposed to be set aside or reversed as the special reserve in accordance with laws and regulations. And then any remaining profit together with any undistributed retained earnings shall be distributed according to the distribution plan proposed by the Board of Directors and submitted to the stockholders' meeting for approval.

The Company adopts the residual dividend policy. In consideration of the expansion of operations and the need of cash flows in the future, when the Company plans to distribute its dividends, the distributable amounts cannot be less than 50% of the cumulative distributable surplus. Moreover, at least 10% of the dividends should be distributed in cash.

Based on the resolutions made during the stockholders' meeting held on June 19, 2019, and the resolution made during the annual stockholders' meeting held on June 13, 2018, respectively, the loss on the appropriation of dividends in 2018 and 2017 need not to be allocated.

(iii) Treasury shares

Based on the resolutions made during the directors' meeting held on May 8, 2019, the Company repurchased 1,500 shares as treasury shares in order to transfer to employees. As of June 30, 2019, a total of 1,410 shares repurchased were not yet cancelled.

Movement of treasury share was as follows:

		For the six months ended June 30, 2019			
	Share (thousands)	Amount			
Balance at period beginning	- \$	-			
Repurchase	1,410	12,815			
Balance at period ended	<u>1,410</u> \$	12,815			

Pursuant to the Securities and Exchange Act, the number of treasury shares purchased cannot exceed 10% of the number of shares issued. The total purchase cost cannot exceed the sum of retained earnings, paid-in capital in excess of par value and realized capital surplus.

In accordance with the requirements of Securities and Exchange Act, treasury shares held by the Company should not be pledged, and do not hold any shareholder rights before their transfer.

Notes to the Consolidated Financial Statements

(r) Share-based payment

Except for the following disclosure, there were no significant changes for share-based payment during the periods from January 1 to June 30, 2019 and 2018. For the related information, please refer to note 6(p) of the consolidated financial statements for the year ended December 31, 2018.

(i) Restricted stocks for employees

At the stockholders' meeting on June 13, 2018, the Company decided to award 2,000 thousand shares of employee restricted shares to the Company's full-time employees who meet certain requirements. The restricted shares have been registered with and approved by the Securities and Futures Bureau of the Financial Supervisory Commission. At the directors' meeting held on November 7, 2018, the Board of Directors decided to issue the first restricted shares of 1,880 thousand shares, and the effective date of the share issuance was on January 14, 2019.

1,880 thousand shares of the aforementioned restricted shares were issued without consideration. 20%, 20%, 30%, and 30% of the restricted shares were vested when the employees continue to provide service for at least 1 year, 2 years, 3 years, and 4 years from the registration and the effective date, and at the same time, meet the performance requirement. After the issuance, the restricted shares are kept by a trust, which is appointed by the Company, before they are vested. These restricted shares shall not be sold, pledged, transferred, gifted or by any other means of disposal to third parties during the custody period. The voting rights of these shares are executed by the custodian, and the custodian shall act based on the law and regulations.

If the shares remain unvested after the vesting period, the Company will purchase all the unvested shares without consideration and cancel the shares thereafter. Restricted shares could be distributed as cash or stock dividends. Employees who are given restricted shares are entitled to partake in the cash injection plan of the Company. The aforementioned new shares are also kept by a trust. If the employees of the Company fail to meet the vesting requirements, the cash or stock dividends will be withdrawn in the form of cash, and a shares cancellation procedure will be performed. However, if employees are able to meet such requirements, the cash or stock dividends will be paid to individual accounts from the trust.

The information of the Company's restricted stock was as follows:

	Unit: in thousand shares		
	For the six months ended June 30, 2019	For the six months ended June 30, 2018	
Outstanding units at beginning period	8	334

Outstanding units at period ended	1,888	334	

As of June 30, 2019 and 2018, unearned employee compensation balances were \$12,629 and \$2,309, respectively.

The expenses (reversal) incurred by the Company for restricted stocks for employees from January 1 to June 30, 2019 and 2018, were \$3,929 and \$(1,472), respectively.

(ii) Employee stock options

The compensation costs related to employee stock options from January 1 to June 30, 2018 were \$376, with a corresponding increase in capital surplus, please refer to note 6(q).

(s) Earnings (loss) per share

Basic earnings (loss) per share and diluted earnings per share for the three months ended June 30, 2019 and 2018 and the six months ended June 30, 2019 and 2018, was computed as follows:

	For the three ended Jun		For the six months ended June 30,

The major change in the balance of contract assets and contract liabilities is the difference between the time frame in the performance obligation to be satisfied and the payment to be received.

(u) Remuneration to employees, directors and supervisors

According to the Company's articles of incorporation which, before revised, require that earning shall first be offset against any deficit, then, a minimum of 10% will be distributed as employee remuneration and a maximum of 2% will be allocated as directors' and supervisors' remuneration. Employees who are entitled to receive the above mentioned employee remuneration, in share or cash, include the employees of the subsidiaries of the Company who meet certain specific requirement.

According to the company's articles of incorporation which were revised on June 13, 2018, require that earning shall first be offset against any deficit, then, a minimum of 10% will be distributed as employee remuneration and a maximum of 2% will be allocated as directors' remuneration. Employees who are entitled to receive the above mentioned employee remuneration, in share or cash, include the employees of the subsidiaries of the Company who meet certain specific requirement.

The Company had loss before income tax for the six months ended June 30, 2019. Despite the Company had profit before income tax for the six months ended June 30, 2018, yet the Company had accumulated deficits thus, no remuneration to employees, directors and supervisors was recognized.

The remunerations to employees amounted to \$1,344, and the remunerations to directors amounted to \$0 for the year ended December 31, 2018. The amounts, as stated in the consolidated financial statements, are identical to those of the actual distributions. Related information would be available at the Market Observation Post System website.

(v) Financial Instruments

Except for the contention mentioned below, there was no significant change in the fair value of the Group's financial instruments and degree of exposure to credit risk, liquidity risk and market risk arising from financial instruments. For the related information, please refer to note 6(t) of the consolidated financial statements for the year ended December 31, 2018.

(i) Credit risk of receivables

For credit risk exposure of note and accounts receivables, please refer to note 6(d).

Other financial assets at amortized cost including cash and cash equivalents, other receivables, and guaranteed deposits, are considered to have low risk, and thus, the impairment provision recognized during the period is limited to 12 months expected losses.

(ii) Liquidity Risk

The following table shows the contractual maturities of financial liabilities, excluding estimated interest payments:

	Carrying amount		Contractual cash flows	Within a year	Over 1 years

The Group does not expect the cash flows included in the maturity analysis, to occur significantly earlier or at significantly different amounts.

(iii) Market risk

1) Currency risk (expressed in thousands for foreign currencies)

The Group's significant exposure to foreign currency risk was as follows:

	June 30, 2019			December 31, 2018			June 30, 2018			
Einen siel seeste		reign rency	Exchange rate	NTD	Foreign currency	Exchange rate	NTD	Foreign currency	Exchange rate	NTD

		=31.060			=30.715		:	=30.46	

2) Sensitivity analysis

The Group's exposure to foreign currency risk arises from the translation of the foreign currency exchange gains and losses on cash and cash equivalents, notes and accounts receivable, other receivables, short-term borrowings, notes and accounts payable, and other payables that are denominated in foreign currency.

A weakening (strengthening) 5% of each foreign currency against the functional currency on June 30, 2019 and 2018 would have affected the net profit before tax as follows:

	June	June 30, 2018	
USD (against the NTD)			
Appreciate 5%	\$	(1,764)	(1,502)
Depreciate 5%		1,764	1,502
USD (against the EUR)			
Appreciate 5%		14	209
Depreciate 5%		(14)	(209)

The analysis is performed on the same basis for both periods.

3) Foreign exchange gain and loss on monetary items

As the Group deals in diverse foreign currencies, gains or losses on foreign exchange were summarized as a single amount for disclosure. For the three months and the six months ended June 30, 2019 and 2018, the foreign exchange gains (losses), including realized and unrealized, amounted to \$1,218, \$(2,516), \$560 and \$(2,835), respectively.

(iv) Interest rate analysis

Please refer to liquidity risk for the details of financial assets and liabilities exposed to interest rate risk.

The following sensitivity analysis is based on the risk exposure to interest rate on the derivative and non-derivative financial instruments on the reporting date. The rate of change is expressed as the interest rate increases or decreases by 0.25% when reporting to management internally, which also represents management of the Group's assessment on the reasonably possible interval of interest rate change.

Notes to the Consolidated Financial Statements

If the interest rate had increased or decreased by 0.25%, the net loss before tax would have increased or decreased by \$182 for the six months ended June 30, 2019, and the net profit before tax would have decreased or increased by \$100 for the six months ended June 30, 2018, which would mainly result from the bank savings and short-term borrowings with variable interest rates at the reporting date.

(v) Fair value of financial instruments

1) Fair value hierarchy

The fair value of financial assets and liabilities at fair value through profit or loss, financial instruments used for hedging and of financial assets at fair value through other comprehensive income are measured on a recurring basis.

Different levels of the fair value hierarchy to be used in determining the fair value of financial instruments are as follows:

- a) Level 1: quoted prices (unadjusted) in active markets for identifiable assets or liabilities.
- b) Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- c) Level 3: inputs for the assets or liability that are not based on observable market data.

The carrying amount and fair value of the Group's financial assets and liabilities, including the information on fair value hierarchy were as follows; however, except as described in the following paragraphs, for financial instruments not measured at fair value whose carrying amount is reasonably close to the fair value, and for equity investments that has no quoted prices in the active markets and lease liabilities, disclosure of fair value information is not required:

2) Fair value valuation technique for financial instruments not measured at fair value

The book value of financial assets and liabilities at amortized cost in the consolidated report is approximately its fair value.

3) Fair value valuation technique for financial instruments measured at fair value

a) Non-derivative financial instruments

A financial instrument will use the public quoted price of the active market as the fair value if it has the public quoted price of the active market.

Measurements of fair value of financial instruments without an active market are based on a valuation technique or quoted price from a competitor. Fair value measured by using a valuation technique can be extrapolated from similar financial instruments, the discounted cash flow method, or other valuation technique including a model using observable market data at the reporting date.

b) Derivative financial instruments

Measurement of fair value of derivative instruments is based on the valuation techniques that are generally accepted by the market participants. Fair value of forward currency exchange is usually determined by using the forward currency rate.

- 4) There were no transfer among fair value hierarchies in the six months ended June 30, 2019 and 2018.
- 5) Reconciliation of level 3 fair values

	eq	uoted uity uments
Balance at January 1, 2018	\$	124,974
Total profit or loss		
Recognized under other comprehensive income		2,450
Change to equity method		(93,450)
Balance at June 30, 2018	\$	33,974

6) Quantified information on significant unobservable inputs (Level 3) used in fair value measurement

The Group's financial instruments that use Level 3 inputs to measure fair value include "financial assets measured at "fair value through other comprehensive income— equity investments".

Financial assets at fair value through other comprehensive income—equity investments without an active market have more than one significant unobservable inputs. The significant unobservable inputs of financial assets at fair value through other comprehensive income—equity investments without an active market individually independent, and there is no correlation between them.

Quantified information of significant unobservable inputs was as follows:

Item	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Financial assets at fair value through other comprehensive income -equity instruments without an active market (Preferred stock)	Income Approach – perpetual annuity	·Weighted Average Cost of Capital (WACC) as of June 30, 2018 was 4.21% ·Expected rate on return for preferred stock as of June 30, 2018 was 3%	The higher the WACC and the Expected rate on return are, the lower the fair value will be.

Fair value measurements in Level 3-sensitivity analysis of reasonably possible alternative assumptions

For fair value measurements in Level 3, if change one or more of the evaluation parameters, the other comprehensive income would have the following effects:

			Other compreh	ensive income
	Input	Change	Favorable	Unfavorable
June 30, 2018				
Equity instruments without an active market (Preferred stock)	WACC	1%	4,018	(4,018)
	Expected rate on return for preferred stock	1%	4,018	(4,018)

The favorable and unfavorable effects represent the changes in fair value, and fair value is based on a variety of unobservable inputs calculated using a valuation technique. The analysis above only reflects the effects of changes in a single input, and it does not include the interrelationships with another input.

(w) Financial risk management

There were no significant changes in the Group's financial risk management and policies as disposed in note 6(u) of the consolidated financial statements for the year ended December 31, 2018.

(x) Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. Capital consists of ordinary shares and retained earnings.

The Group monitors the capital structure by way of periodical review on the liability ratio. The Group's capital is the "total equity" in the balance sheet, same with the total liabilities being subtracted to the total assets.

As of June 30, 2019 and 2018, the liability ratio were as follows:

	June 30, 20	December 31, 2018	June 30, 2018
Total liabilities	\$ 356,1	16 232,644	315,925
Total assets	906,4	69 817,908	931,093
Liability ratio	39 %	6 28 %	34 %

As of June 30, 2019, the raise in the debt-to-equity ratio was due to the increase in borrowing. Likewise, the borrowing increase was a direct result of the Group's demand for funding.
