# SAFETY INFORMATION

## Federal Communications Commission (FCC) Notice (U.S. Only)

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Use only an RF shielded cable that was supplied with the display when connecting this display to a computer device.

To prevent damage which may result in fire or shock hazard, do not expose this appliance to rain or excessive moisture.

THIS CLASS A DIGITAL APPARATUS MEETS ALL REQUIREMENTS OF THE CANADIAN INTERFERENCE CAUSING EQUIPMENT REGULATIONS.

## CE

**WARNING:** This equipment is compliant with Class A of EN55032/CISPR 32. In a residential environment this equipment may cause radio interference.

# SAFETY INFORMATION

## Waste Electrical and Electronic Equipment-WEEE

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product

For Private Households in the European Union. To help conserve natural resources and ensure the product is recycled in a manner that protects human health and the environment, we would like to bring your attention to the following:

- The crossed-out dustbin on the device or outer packaging indicates the product is compliant with European WEEE (Waste Electrical and Electronic Equipment) Directive
- Always dispose of the old devices separately from household waste
- Batteries should be removed beforehand and disposed separately to the right collection system
- You are responsible with regard to the deletion of personal data on old devices before disposal
- Private households can hand in their old devices free of charge
- For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product

## Turkey RoHS

Türkiye Cumhuriyeti: EEE Yönetmeliğine Uygundur.

## Ukraine RoHS

Обладнання відповідає вимогам Технічного регламенту щодо обмеження використання деяких небезпечних речовин в електричному та електронному обладнанні, затвердженого постановою Кабінету Міністрів України від 3 грудня 2008 № 1057.

# PRECAUTIONS

## Symbols used in this manual

	This icon indicates the existence of a potential hazard that could result in personal injury or damage to the product.
	This icon indicates important operating and servicing information.

## Notice

- Read this User Manual carefully before using the LCD display and keep it for future reference.
- The product specifications and other information provided in this User Manual are for reference only. All information is subject to change without notice. Updated content can be downloaded from our web site at [www.agneovo.com](http://www.agneovo.com).
- To protect your rights as a consumer, do not remove any stickers from the LCD display. Doing so may affect the determination of the warranty period.

## Cautions When Setting Up

- Do not place the LCD display near heat sources, such as a heater, exhaust vent, or in direct sunlight.
- Do not cover or block the ventilation holes in the housing.
- Place the LCD display on a stable area. Do not place the LCD display where it may subject to vibration or shock.
- Place the LCD display in a well-ventilated area.
- Do not place the LCD display outdoors.
- To avoid the risk of shock or permanent damage to the set, do not expose the display to dust, rain, water or an excessively moist environment.
- Do not spill liquid or insert sharp objects into the LCD display through the ventilation holes. Doing so may cause accidental fire, electric shock or damage the LCD display.

# PRECAUTIONS

## Cautions When Using

- Use only the power cord supplied with the LCD display.
- The power outlet should be installed near the LCD display and be easily accessible.
- If an extension cord is used with the LCD display, ensure that the total current consumption plugged into the power outlet does not exceed the ampere rating.
- Do not allow anything to rest on the power cord. Do not place the LCD display where the power cord may be stepped on.
- If the LCD display will not be used for an indefinite period of time, unplug the power cord from the power outlet.
- To disconnect the power cord, grasp and pull by the plug head. Do not tug on the cord; doing so may cause fire or electric shock.
- Do not unplug or touch the power cord with wet hands.
- When turning off the display by detaching the power cord, wait 6 seconds before re-attaching the power cord for normal operation.
- Do not knock or drop the display during operation or transportation.

## Cleaning and Maintenance

- To protect your display from possible damage, do not put excessive pressure on the LCD panel. When moving your display, grasp the frame to lift; do not lift the display by placing your hand or fingers on the LCD panel.
- Unplug the display if you need to clean it with a slightly damp cloth. The screen may be wiped with a dry cloth when the power is off. However, never use organic solvent, such as, alcohol, or ammonia-based liquids to clean your display.
- If your display becomes wet, wipe it with dry cloth as soon as possible.
- If a foreign substance or water gets in your display, turn the power off immediately and disconnect the power cord. Then remove the foreign substance or water, and send the unit to the maintenance center.
- In order to maintain the best performance of your display and ensure a longer lifetime, we strongly recommend using the display in a location that falls within the following temperature and humidity ranges.
  - ◆ Temperature: 0-40°C (32-104°F)
  - ◆ Humidity: 20-80% RH

### Warning:

Unplug the power cord from the power outlet and refer to qualified service

personnel under the following conditions:

- ◆ When the power cord is damaged.
- ◆ If the LCD display has been dropped or the housing has been damaged.
- ◆ If the LCD display emits smoke or a distinct odor.

# PRECAUTIONS

## Notice for the LCD Display

- In order to maintain the stable luminous performance, it is recommended to use low brightness setting.
- Due to the lifespan of the lamp, it is normal that the brightness quality of the LCD display may decrease with time.
- When static images are displayed for long periods of time, the image may cause an imprint on the LCD display. This is called image retention or burn-in.
  - ◆ To prevent image retention, do any of the following:
    - Set the LCD display to turn off after a few minutes of being idle.
    - Use a screen saver that has moving graphics or a blank white image.
    - Execute the ANTI-BURN-IN function of the LCD display. See **SYSTEM 2 > ANTI-BURN-IN** section.
    - Switch desktop backgrounds regularly.
    - Adjust the LCD display to low brightness settings.
    - Turn off the LCD display when the system is not in use.
  - ◆ Things to do when the LCD display shows image retention:
    - Turn off the LCD display for extended periods of time. It can be several hours or several days.
    - Use a screen saver and run it for extended periods of time.
    - Use a black and white image and run it for extended periods of time.
- There are millions of micro transistors inside the LCD display. It is normal for a few transistors to be damaged and to produce spots. This is acceptable and is not considered a failure.
- **IMPORTANT:** Always activate a moving screen saver program when you leave your display unattended. Always activate a periodic screen refresh application if the unit will display unchanging static content. Uninterrupted display of still or static images over an extended period may cause “burn in”, also known as “after-imaging” or “ghost imaging”, on your screen. This is a well-known phenomenon in LCD panel technology. In most cases, the “burned in” or “after-imaging” or “ghost imaging” will disappear gradually over a period of time after the power has been switched off.
- **WARNING:** Severe “burn-in” or “after-image” or “ghost image” symptoms will not disappear and cannot be repaired. This is also not covered under the terms of your warranty.

# CHAPTER 1: PRODUCT DESCRIPTION

## 1.1 Unpacking

- This product is packed in a packaging box which contains standard accessories.
- Any other optional accessories will be packed separately.
- Considering the size and weight of the display, it is recommended that this product is carried out by two persons.
- After opening the packaging box, ensure that the included items are in good condition and complete.

## 1.2 Package Contents

When unpacking, check if the following items are included in the package. If any of them is missing or damaged, contact your dealer.

LCD Display

Remote Control

Quick Start Guide

Angle iron for splicing with screw x 4pcs

Power Cord

LAN Cable

RS232 Cable

HDMI Cable

IR receiver cable

Battery x 2

### Note:

- ◆ Power Requirements:  
AC 100-240V 50/60 Hz is used.
- ◆ Disconnect the power supply when it is to be kept idle for a long time.
- ◆ The pictures are for reference only. Actual items may vary upon shipment.
- ◆ Remote control is shipped with the supplied AAA batteries.
- ◆ For all other regions, apply a power cord that conforms to the AC voltage of the power socket and has been approved by and complies with the safety regulations of the particular country.
- ◆ You might like to save the package box and packing material for shipping the display.

# PRODUCT DESCRIPTION

## 1.3 Preparing for the Installation

- Due to the high power consumption, always use the plug exclusively designed for this product. If an extended line is required, please consult your service agent.
- The product should be installed on a flat surface to avoid tipping. The distance between the back of the product and the wall should be maintained for proper ventilation. Avoid installing the product in the kitchen, bathroom or any other places with high humidity so as not to shorten the service life of the electronic components.
- The product can normally operate only under 3000m in altitude. In installations at altitudes above 3000m, some abnormalities may be experienced.

## 1.4 Wall Mounting Installation

To mount this display to a wall, you will have to obtain a standard wall-mounting kit (commercially available).

To wall-mount the LCD display, screw the mounting bracket to the VESA holes at the rear of the LCD display.

### Warning:

- ◆ Do not press too hard on the LCD panel or edge of the frame, as this may cause the device to malfunction.

### Note:

- ◆ Avoid the wall-mounting kit to block the ventilation holes on the back of the display.
- ◆ Secure the LCD display on a solid wall strong enough to bear its weight.
- ◆ Lay a protective sheet on a table, which was wrapped around the display when it was packaged, beneath the screen surface so as not to scratch the screen face.
- ◆ Ensure you have all accessories for mounting this display (wall mount, ceiling mount, etc).
- ◆ Follow the instructions that come with the base mounting kit. Failure to follow correct mounting procedures could result in damage to the equipment or injury to the user or installer. Product warranty does not cover damage caused by improper installation.

# PRODUCT DESCRIPTION

## 1.4.1 VESA Grid

Model Name	VESA Grid
PN-46D2	400(W) x 400(H)mm

### Caution:

To prevent the display from falling:

- ◆ For wall or ceiling installation, we recommend installing the display with metal brackets which are commercially available. For detailed installation instructions, see the guide received with the respective bracket.
- ◆ To lessen the probability of injury and damage resulting from fall of the display in case of earthquake or other natural disaster, be sure to consult the bracket manufacturer for installation location.

## 1.4.2 Ventilation Requirements for Enclosure Locating

To allow heat to disperse, leave space between surrounding objects as shown in the diagram below.

### Note:

- ◆ For the wall-mounting kit, use M6 mounting screws (having a length 12 mm longer than the thickness of the mounting bracket) and tighten them securely.

# PRODUCT DESCRIPTION

## 1.5 LCD Display Overview

### 1.5.1 Input/Output Terminals

**1 DP OUT**

Connect DisplayPort signals output.

**2/3 HDMI1 IN / HDMI2 IN**

Connect HDMI signals input.

**4/5 DP1 IN / DP2 IN**

Connect DisplayPort signals input.

**6 USB**

Connects USB 2.0 for service.

**7 LAN**

For LAN connection with an Ethernet cable.

**8 IR IN**

IR signal input.

**9 RS232 IN:**

Connect RS232 input from external equipment.

**10 RS232 OUT:**

Connect RS232 output to additional displays.

**11 AC IN**

AC power input from the wall outlet.

**12 MAIN POWER SWITCH**

Switch the main power on/off.

#### Note:

- ◆ Signals input via RS232-IN can be output via RS232-OUT.
- ◆ LAN input interface for transmitting system control commands only.
- ◆ HDMI1/HDMI2 input port supports the maximum resolution of 3840\*2160 @60Hz.
- ◆ DP1/DP2 input port supports the maximum resolution of 3840\*2160@60Hz.
- ◆ DP-OUT port supports the output of signals input via HDMI/DP ports.
- ◆ To obtain sound display effect, it is recommended to use the provided wires or wires of a well-known brand.

# PRODUCT DESCRIPTION

## 1.6 Remote Control

### 1.6.1 General Functions

#### Note:

- ◆ Remark: When the product is different from the picture, the product prevails.

- [POWER ON] POWER button**  
Turns the display on.
- [SOURCE] button**  
Switches the video input source.
- [POWER OFF] POWER button**  
Turns the display off.
- [NUMERIC KEYS] button**  
Enters numbers for Network and IDSET settings.
- [FREEZE] button**  
No function.
- [IDSET] buttons**  
Monitor IR pass number.
- [OPS] button**  
No function.
- [HDMI1 / HDMI2 / DVI / DP / VGA] buttons**  
No function.
- [▲][▼][◀][▶] Navigation buttons**  
Navigates through menus, selects items, and adjusts values.
- [OK] button**  
Chooses items or accepts the settings made in the OSD menu.
- [–][+] VOLUME button**  
No function.
- [MENU] button**  
Access the OSD menu.
- [EXIT] button**  
Exit the current operations.
- [SPLICE] button**  
UniWall Enable On.
- [DIVIDE] button**  
UniWall Enable Off.
- [SOUND MODE] button**  
No function.
- [PICTURE MODE] button**  
Quickly switch the PICTURE MODE.
- [ASPECT] button**  
Switch the aspect ratio of screen.
- [INFO] button**  
View current signal information.
- [▶][||][■][⌂][◀][▶][◀▶][▶▶] button**  
No function.

# PRODUCT DESCRIPTION

## 1.6.2 Inserting the Batteries in the Remote Control

The remote control is powered by two 1.5V AAA batteries.

To install or replace batteries:

- 1 Press and then slide the cover to open it.
- 2 Align the batteries according to the (+) and (-) indications inside the battery compartment.
- 3 Replace the cover.

## 1.6.3 Handling the Remote Control

- Do not subject to strong shock.
- Do not allow water or other liquid to splash the remote control. If the remote control gets wet, wipe it dry immediately.
- Avoid exposure to heat and steam.
- Other than to install the batteries, do not open the remote control.

## 1.6.4 Operating Range of the Remote Control

Point the top of the remote control toward the display's remote control sensor (on the left or right side) when pressing a button.

When using the remote control, the distance from the remote control to the sensor on the display should be less than 8m/26ft, and the horizontal and vertical angles should be less than 30°.

### Caution:

The incorrect use of batteries can result in leaks or bursting. Be sure to follow these instructions:

- ◆ Place “AAA” batteries matching the (+) and (-) signs on each battery to the (+) and (-) signs of the battery compartment.
- ◆ Do not mix battery types.
- ◆ Do not combine new batteries with used ones. It causes shorter life or leakage of batteries.
- ◆ Remove the dead batteries immediately to prevent them from liquid leaking in the battery compartment. Don't touch exposed battery acid, as it can damage your skin.

### Note:

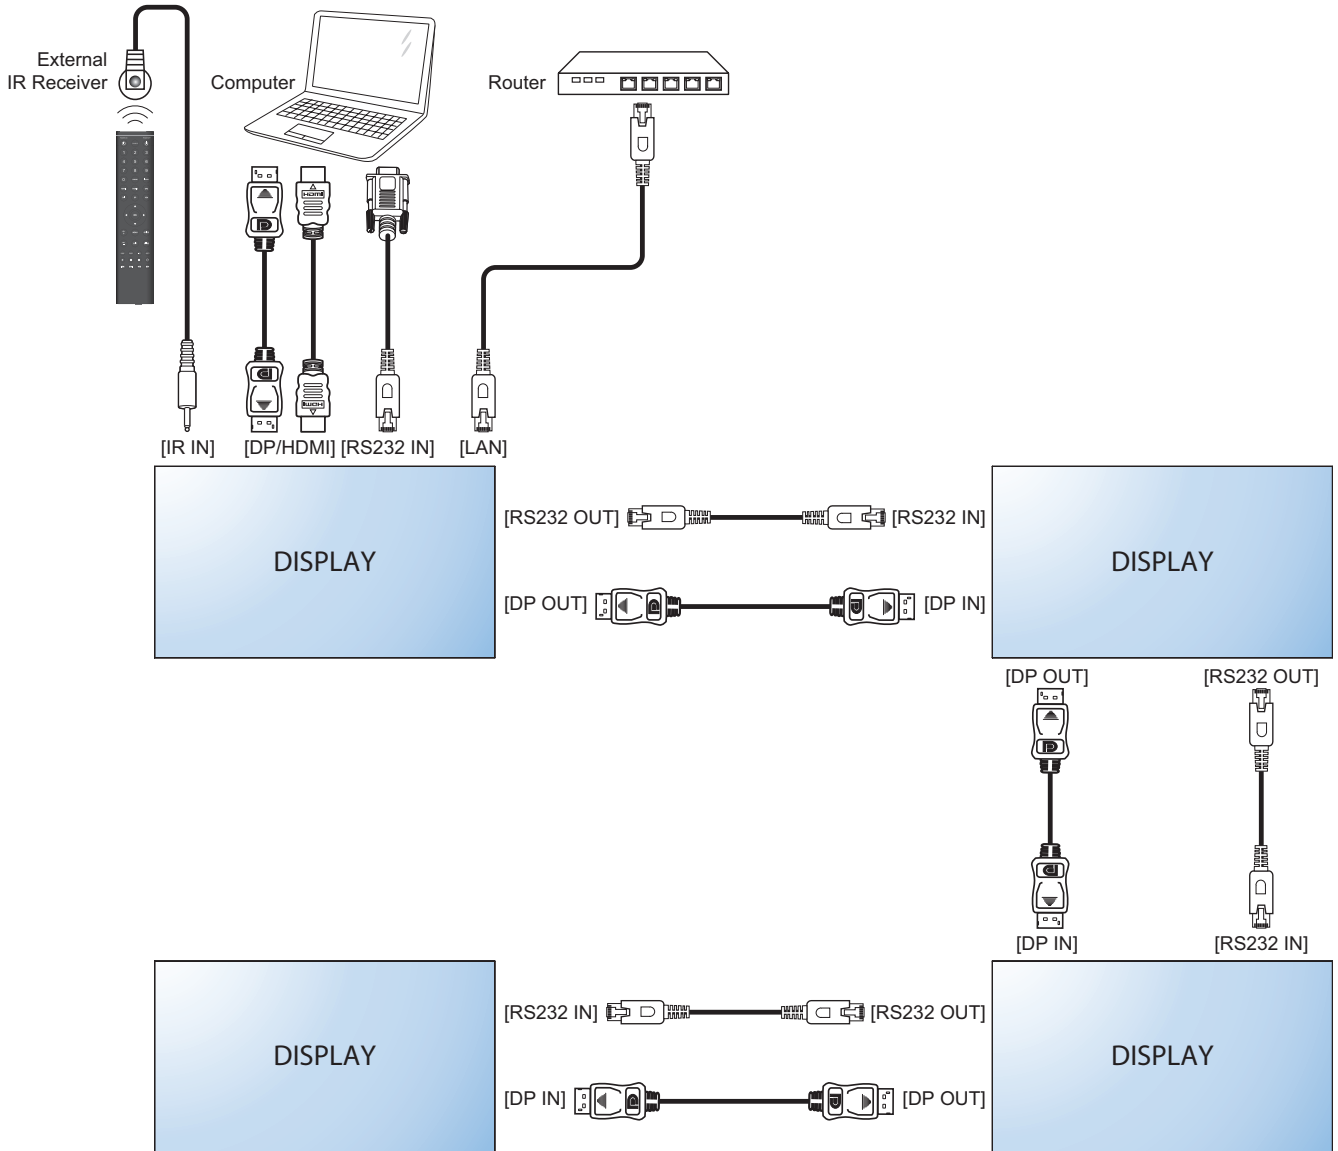

- ◆ If you do not intend to use the remote control for a long period, remove the batteries.
- ◆ The remote control may not function properly when the remote control sensor on this display is under direct sunlight or strong illumination, or when there is an obstacle in the path of signal transmission.

# CHAPTER 2: MAKING CONNECTIONS

# MAKING CONNECTIONS

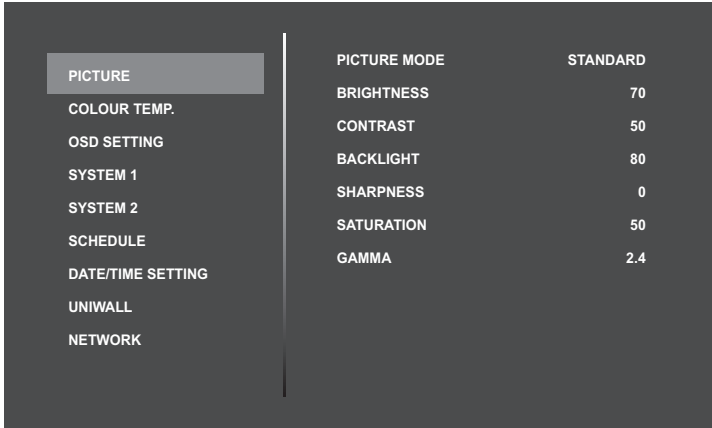

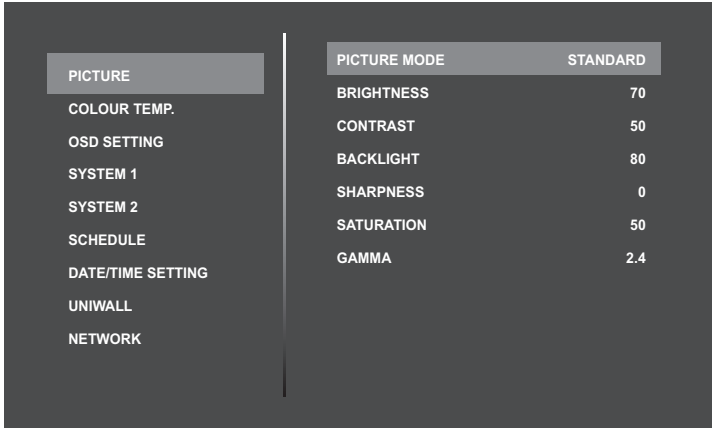

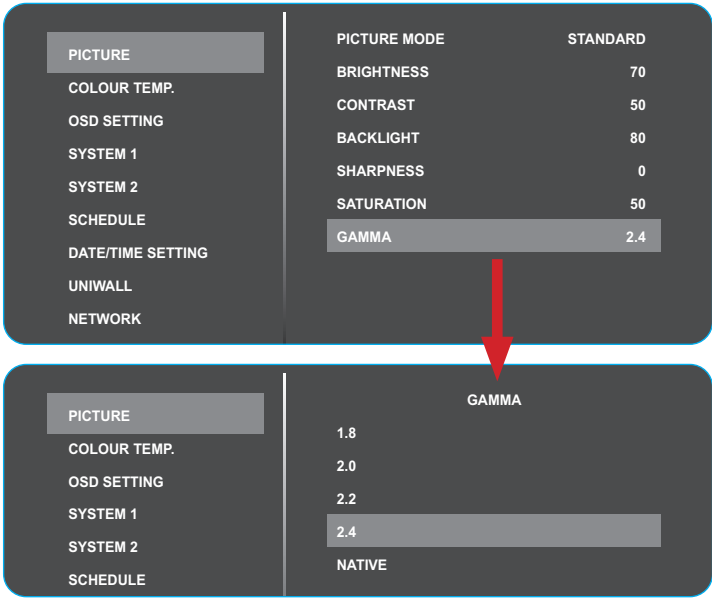

## Connecting Multiple Displays in a Daisy-chain Configuration

# CHAPTER 3: ON SCREEN DISPLAY MENU

## 3.1 Using the OSD Menu

#	Menu Navigation	Operation
1	<p>Display the main menu screen.</p> 	<p>Press the <b>MENU</b> button.</p>
2	<p>Select the submenu.</p>  <p>The highlighted item (gray) indicates the active submenu.</p>	<ol style="list-style-type: none"> <li>1 Press the <b>▲/▼</b> button to select the menu item.</li> <li>2 Press the <b>OK</b> button to enter the submenu.</li> </ol>
3	<p>Adjust the settings.</p> <p>The highlighted item indicates the active submenu.</p> <p>For example:</p> 	<ol style="list-style-type: none"> <li>1 Press the <b>▲/▼</b> button to select an option.</li> <li>2 Press the <b>OK</b> button to confirm.</li> <li>3 Press the <b>▲/▼/◀/▶</b> button to select an item or adjust the values.</li> </ol>

# ON SCREEN DISPLAY MENU

#	Menu Navigation	Operation
4	Exit the submenu.	Press the <b>EXIT/MENU</b> button to return to the previous menu.
5	Close the OSD window.	Press the <b>EXIT/MENU</b> button to return to the previous menu.

When settings are modified, all changes are saved when the user does the following:

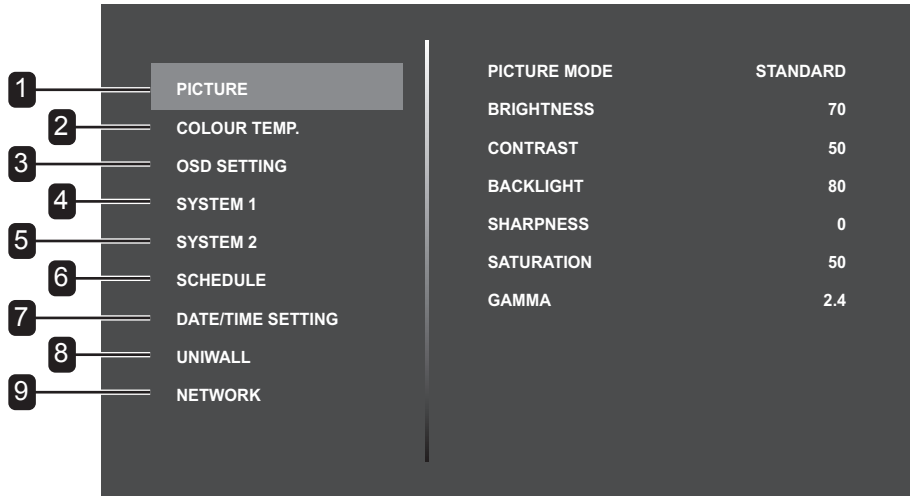

- Proceeds to the another menu.
- Exits the OSD menu.
- Waits for the OSD menu to disappear.

## Note:

- ◆ Availability of some menu items depend on the input source signal. If the menu is not available, it is disabled and grayed out.

## 5.3 Cleaning

### Caution When Using the Display

- Do not bring your hands, face or objects close to the ventilation holes of the display. The top of the display is usually very hot due to the high temperature of exhaust air being released through the ventilation holes. Burns or personal injuries may occur if any body parts are brought too close. Placing any object near the top of the display could also result in heat related damage to the object as well as the display itself.
- Be sure to disconnect all cables before moving the display. Moving the display with its cables attached may damage the cables and thus cause fire or electric shock.
- Disconnect the power plug from the wall outlet as a safety precaution before carrying out any type of cleaning or maintenance procedure.

### Front Panel Cleaning Instructions

- The front of the display has been specially treated. Wipe the surface gently using only a cleaning cloth or a soft, lint-free cloth.
- If the surface becomes dirty, soak a soft, lint-free cloth in a mild detergent solution. Wring the cloth to remove excess liquid. Wipe the surface of the display to remove dirt. Then use a dry cloth of the same type to dry.
- Do not scratch or hit the surface of the panel with fingers or hard objects of any kind.
- Do not use volatile substances such as insect sprays, solvents and thinners.

### Cabinet Cleaning Instructions

- If the cabinet becomes dirty, wipe the cabinet with a soft, dry cloth.
- If the cabinet is extremely dirty, soak a lint-free cloth in a mild detergent solution. Wring the cloth to remove as much moisture as possible. Wipe the cabinet. Use another dry cloth to wipe over until the surface is dry.
- Do not allow any water or detergent to come into contact with the surface of the display. If water or moisture gets inside the unit, operating problems, electrical and shock hazards may result.
- Do not scratch or hit the cabinet with fingers or hard objects of any kind.
- Do not use volatile substances such as insect sprays, solvents and thinners on the cabinet.
- Do not place anything made from rubber or PVC near the cabinet for any extended periods of time.

## 5.4 Troubleshooting

Follow the solutions below to solve these common problems, and contact us if the problem persists.

Symptom	Possible Cause	Remedy
The Power indicator does not come on	<ul style="list-style-type: none"><li>The monitor is not powered on.</li></ul>	<ul style="list-style-type: none"><li>Check if the power cord is connected, and switch ON the monitor.</li></ul>
The Power indicator is on, but no image is displayed	<ul style="list-style-type: none"><li>The Video wire is detached or connected improperly.</li><li>No video signal input.</li></ul>	<ul style="list-style-type: none"><li>Connect or replace the video wire, and ensure proper and correct connection.</li><li>Check the signal source, and check if it is properly connected at the output end.</li></ul>
Image jerking or ripple	<ul style="list-style-type: none"><li>There exists an electric device that interferes with the video signals.</li></ul>	<ul style="list-style-type: none"><li>Turn off the electric device, or relocate the monitor.</li></ul>
Dim or extremely bright screen	<ul style="list-style-type: none"><li>Low or high brightness/contrast.</li></ul>	<ul style="list-style-type: none"><li>Check the brightness/contrast settings, or restore to default settings.</li></ul>
Colour difference	<ul style="list-style-type: none"><li>Improper chromatic saturation.</li><li>Improper RGB values or colour temperature.</li></ul>	<ul style="list-style-type: none"><li>Check the chromatic saturation.</li><li>Adjust the RGB values or reset the colour temperature.</li><li>Restore to default settings.</li></ul>
Image distortion	<ul style="list-style-type: none"><li>Improper aspect ratio.</li></ul>	<ul style="list-style-type: none"><li>Reset the aspect ratio.</li></ul>
